Where business meets fashion

---

---

"Our decision to choose StyleCAD as the software for our patternmaking department has been well rewarded.

The control of our pattern library, **reduced pattern making time** and **speedier communication** to and from our off shore suppliers has kept our company **competitive**. Some of our patternmakers had no experience of CAD of any kind yet were able **adapt easily** to working on screen and felt **very quickly** in control. Others found Style CAD to be **flexible and user friendly yet sophisticated** enough for the most complex tasks. It has been a **very successful move** for our company to introduce StyleCAD."
