

Shriners Hospitals for Children-Northern California is **grateful** to StyleCAD USA. StyleCAD has advanced the standard of care at Shriners Hospitals for Children-Northern California for children suffering from acute burns. Using the proprietary software provided by StyleCAD USA, the Pressure Garment Program at the hospital is able to **quickly manufacture on-site, custom and frequently complex tailored pressure garments** without the pain often associated with post-pattern making fittings.

*Thank you StyleCAD USA from everyone at Shriners Hospitals
for Children-Northern California,
but particularly the children you help us serve with compassion.*
