

"I have been an industry patternmaker for over 30 years and

StyleCAD software has brought a whole new joy and enthusiasm to my craft.

...After researching all options, I decided on StyleCAD and I am so glad that I found them.

First of all, StyleCAD made it so easy to get into, by allowing me to make payments.

This was **essential for a freelancer**. All the other software companies told me to go talk to a bank.

The training was really good also. I received **one on one training** and got to practice on my own patterns while learning. I had very little down time.

Working with StyleCAD is very similar to manual drafting and **mastery of the program came easily**.

I have also been **very happy** with the grading portion of the program.

I literally learned the basics to grading in about half an hour and was off & running.

The StyleCAD support has also been **fantastic with time efficient, personal customer service**.

*Besides StyleCAD being intuitive & user friendly,
it is like no other software company.*

I feel we are like friends & partners in the garment industry."

Sincerely,

Stacey East, Technical Design Studio
